

YMM skiffs range from 18 - 24 feet long and 6 - 7 feet wide. They come in Flat, Semi-V, or Shrimpy bottoms.

Yukon Marine Manufacturing is a sole skiff building facility in the AVCP region. They currently construct 20 - 26 skiffs per year. Since 1999, the company has constructed and sold over 518 skiffs.

The skiffs built by YMM would be ideal for a set netting operation in Bristol Bay, commercial & subsistence in the Kuskokwim River and Norton Sound.

Yukon Marine Manufacturing, LLC. (YMM) is a subsidiary of the Yukon Delta Fisheries Development Association (YDFDA). The company is a skiff building and repair facility located in Emmonak, AK. The aluminum skiffs built by the company are designed by the local fishermen and constructed by the local craftsmen to handle the rough Bering Sea and the mighty Yukon Delta. These Skiffs are meant to take beating and get right up on step with a load of fish.

Yukon Marine Manufacturing, LLC.
